

Facts and Figures

Science on Stage: iStage 1-3 in 2016

Teachers as multipliers

inspire students

qualified work force for companies

Since 2011 SAP CSR collaborates with Science on Stage, the largest European network for STEM teachers (science, technology, engineering and mathematics). The goal of the cooperation is to develop and spread innovative teaching ideas. Current and relevant topics engage students and encourage them to consider a career in science, engineering and IT.

So far three brochures with teaching materials have been published:

iStage 1 - Information and Communications Technology in Natural Science (ICT)

iStage 2 - Smartphones in Science Teaching

iStage 3 - Football in Science Teaching

The brochures and any other additional information material, e. g. for teacher trainings, display the following logo combination:

teacher trainings and workshops
→ thereof 12 teacher trainings iStage 3

„I think I became more focused and better in my job through these projects. I am able to break the ‘vicious circle’ of the monotonic school terms bringing new exciting ideas into the classroom with these projects and reach deeper commitment from my students. As personal gain I am able to maintain my enthusiasm about being a teacher and about my science subject.“

Márta Gajdosné Szabó, teacher from Hungary
